

Senior Marketing Executive

Candidate Application Assessment Task

Duo Group

Presented by Culous Yu

Task 1. Mini Campaign Brief

Campaign Objective:

Generate qualified enquiries for tax depreciation schedules by correcting a costly misconception, that older or renovated investment properties have nothing left to claim.

Target Audience:

Australian property investors who own older residential investment properties or have renovated recently, alongside first-time investors, supported by a referral push to accountants, mortgage brokers, and buyers' agents.

Key Message:

Your older or renovated property may still hold valuable depreciation potential, and a qualified Quantity Surveyor can identify what is claimable.

Recommended Channels:

Google Search to capture high-intent investors, Meta for interest-based reach and lookalikes of the existing database, LinkedIn for referral partners, and an EOFY email to current contacts, with Reddit and investor-forum communities monitored for audience insight.

Call to Action:

"See what your property could hold, request your free, no-obligation estimate."

Key Metrics:

Primarily qualified enquiries and cost per qualified lead, measured against Duo Tax's historic baseline, and secondarily the enquiry-to-schedule conversion rate, tying campaign spend directly to schedules sold.

Task 2. Marketing Copywriting

A. Social Media Caption

"Think your older or renovated investment property has nothing left to claim?
That assumption could be costing you at tax time.

In reality, the building and many renovations, even those completed by a previous owner, may still hold genuine depreciation potential, subject to eligibility. Duo Tax, Australia's most reviewed Quantity Surveyor, can assess what your property is eligible to claim and prepare an ATO-compliant schedule. That single schedule can help strengthen your investment's cash flow for years.

See what your property could hold. Request your free, no-obligation estimate today."
